OBJECTIVE:

Computer Science student at Thammasat University with a strong interest in Data Engineering and Agentic AI. Experienced in Python, SQL, machine learning, and Cloud technologies through academic and personal projects. Seeking a Data Internship to apply analytical and technical skills while contributing to real-world data driven solutions and continuously expanding my expertise.

EDUCATION:

Thammasat University

Bachelor of Computer Science, Faculty of Science and Technology | 2023 – (Expected May 2027)

SKILLS:

Programming Languages: Python, SQL, Java, C, JavaScript, TypeScript

Data Engineer: PySpark, Apache Spark, Databricks, ETL Pipelines

Web Development: React.js, Node.js, Express.js, HTML, CSS

Data & Cloud: Data Analysis, Data Visualization, Data Architecture, AWS, Azure, Firebase

Tools: Docker, Terraform, MongoDB, GitHub Actions

PROJECTS:

AI Personal Health Coach | Next.js, Node.js, MongoDB, AI Agent

- Built a full-stack AI health coaching app with daily check-ins, a dashboard, an AI coach chat, and weekly reflections

Painner – Project Management Web App | React, Node.js, MongoDB, Docker

- Built a full-stack app with 7 MongoDB collections, 30+ RESTful endpoints, and 6 frontend pages
- Implemented JWT authentication and Joi validation; covered with 52 Jest test cases; containerized with Docker

Lost & Found System | AWS Lambda, DynamoDB, S3, LINE API

- Designed a NoSQL data schema on DynamoDB to store and query lost/found item reports
- Built a serverless data pipeline using AWS Lambda + API Gateway to handle LINE webhooks
- Stored image assets and case data on S3

Book Review Sentiment Analysis | Python, TensorFlow, NLP

- Built an LSTM model to classify Amazon Kindle book reviews as Positive / Negative (91.4% accuracy)
- Performed data cleaning and compared LSTM performance against baseline models

EXTRACURRICULAR ACTIVITIES:

Databricks For Data Engineer Bootcamp

- Production-Level Pipelines: Completed an intensive program building end-to-end data pipelines using PySpark, SQL, and Python.

CSTU Spark Camp in AI

- Hands-on LLM & Agentic AI: Gained practical experience in building and experimenting with LLM applications and Agentic AI workflows.
- AI Tools & Deployment: Learned and applied modern AI development tools, Python workflows, and performance optimization techniques for real-world projects.

LANGUAGE SKILLS:

- Thai – Native
- English – Limited working proficiency
- Japanese – Elementary
